

GRAVITY MEDIA

ANY TIME
ANY PLACE
ANYWHERE

REMOTE
POST-PRODUCTION SERVICES

Gravity Media provides post-production facilities for film, drama, entertainment and sport wherever you need them to be: onsite, on location, at home... anywhere.

With a warehouse full of post-production equipment available to rent, our scale, technical expertise and carefully curated cloud-based workflows make us unique. We're flexible, agile and able to provide a tailored edit experience wherever your teams are based.

CRAFT ANYWHERE

Your project and all its assets are housed securely at Gravity Media for complete flexible working either at home or from another location at any time.

- Edit onsite: our 50 cutting rooms at Gravity House in Soho remain open, connected to shared storage, and serviced by hospitality.
- Edit remotely: connect to the same cutting rooms from a remote location that's as good as being in Soho.
- Hybrid working: edit teams can work onsite while others work remotely, or perhaps you'll want to pop into Soho for a socially distanced team viewing. Work in a way that suits your needs.
- Additional 'virtual' edits: save on the cost of room rental for those who prefer to work entirely remotely.
- On production: connect remotely to workstations in the studio or on location.
- Hardware to your door: we deliver and install editing hardware packages for remote working, as well as standalone offline edits, grades, dubs, Creative Cloud and laptops, wherever you require them to be.

SUPPORT

- Our team of experienced engineers are available 24/7 to get you set up and keep you working

TECHNOLOGY

We've combined several pieces of new technology to provide the efficient and secure end-user experience you're used to.

- Avid Media Composer running on HP hardware and Avid Nexis shared storage.
- Leostream handles traffic from multiple cloud-based services, including Teradici, HP Z-Central, Amulet and Windows Remote, to provide a secure gateway and simple interface.
- Web-based client viewings and monitoring from home via Apple TV for multiple users.
- Media upload through FTP or cloud.
- Cloud-hosted services for media reviews and remote collaboration.

SECURITY

We understand how important it is to keep your work safe and secure, which is why we have adopted the highest standards for both physical and network security.

- Cutting rooms secured 24/7 with CCTV and access control, to comply with content owners' standards.
- A highly secure network access platform sits between your project and the remote user, which requires multifactor authentication to get connected.

ABOUT GRAVITY MEDIA

Gravity Media is a leading global provider of sophisticated live broadcast facilities and production services to content owners, creators and distributors. From film and drama to sport and entertainment, our projects are varied but have one thing in common: flawless execution underpinned by client service excellence.
